

Are people in your school WASTING ELECTRICITY?

 **Date:**

 **Time:**

Sometimes people waste electricity by leaving whiteboards and lights on when they are not using them. Is this a problem in your school?

Walk around the school at lunch time or during assembly, when most of the rooms are empty. Check each room to see if the lights or interactive whiteboard have been left switched on when they are not being used.

Use a tally  to record what you find.

 Rooms with a whiteboard left on	 Rooms with lights left on
TOTAL	TOTAL

Make a note of any rooms where everything was switched **off** so you can say "Well done" to the adults and children who are very good at saving electricity.

.....

.....

Remember to share your results with the rest of the school.

Repeat your spot check in a few weeks to see if people are getting better at saving electricity.
