

Are people in your school WASTING ELECTRICITY?

 **Date:**

 **Time:**

Sometimes people waste electricity (and money) by leaving whiteboards and lights on when they are not using them. Is this a problem in your school?

Walk around the school at lunch time or during assembly, when most of the rooms are empty. Check each room to see how many lights and appliances have been left on unnecessarily. Record what you find in the table.

Room	Lights 	Computers 	Monitors 	Whiteboards & projectors 
<i>Example</i>	<i>7</i>	<i>1</i>	<i>4</i>	<i>2</i>

If you notice any other way that electricity is being wasted (e.g., appliances left on standby) note it below or on another piece of paper.

.....

.....

**Remember to share your results with the rest of the school.
Repeat your spot check in a few weeks to see if people are
getting better at saving electricity.**
