The Eco Team leads a great 'Switch Off' campaign.

Zero carbon

The cleaners switch off the lights after cleaning the classrooms.

Zero carbon

The caretaker checks the timers on the school boilers.

Zero carbon

The school has a fantastic 'no energy' day with lots of lessons outside.

Zero carbon

Teachers open the blinds and switch off the lights on sunny days.

Zero carbon

The Eco Team carry out 'spot checks' to see if lights and smart boards are switched off.

Zero carbon

The kitchen staff switch off their freezers and fridges for the summer holiday.

Zero carbon

The Headteacher introduces a class 'Switch Off' award in celebration assemblies.

Zero carbon

The Business Manager keeps track of the school's energy bills.

Zero carbon

You notice lots of empty classrooms with the lights left on.

Zero carbon

The heating is on even though it's warm outside.

Zero carbon

During winter it's so hot inside that children and teachers are working in T shirts.

Zero carbon

Teachers are in the habit of leaving their smart boards on at lunchtime.

Zero carbon

Outside doors are often left open when the heating is on.

Zero carbon

Computers are left on overnight and during school holidays.

Zero carbon

Nobody keeps an eye on how much energy the school is using.

Zero carbon

Teachers stick displays on windows and stop the natural light coming in.

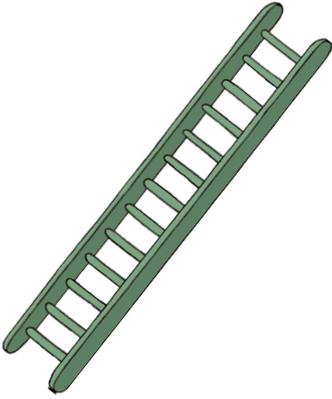

Zero carbon

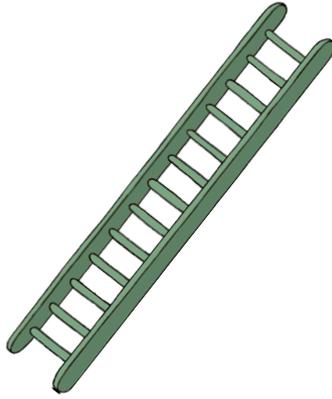

A teacher puts a bookcase in front of a radiator.

The Eco Team design great new labels for the school's recycling bins.

Zero waste

Every classroom and office has a scrap paper drawer for reusing paper.

Zero waste

Children's fruit peels and cores are recycled in a compost bin.

Zero waste

The Headteacher orders school fleeces made from recycled plastic bottles.

Zero waste

The Eco Team carry out a waste audit each year to check what is in the school's bins.

Zero waste

The school's toilet paper and hand towels are made from recycled paper.

Zero waste

The school runs a swap-shop to help families reuse school uniforms.

Zero waste

The Eco Team meet the kitchen staff to talk about reducing food waste.

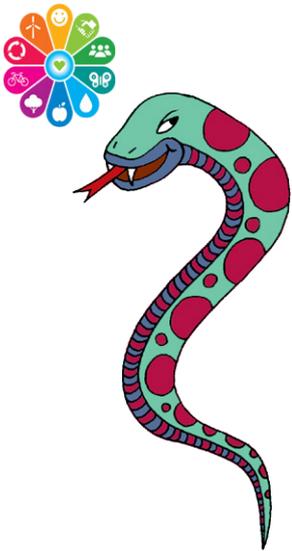

Zero waste

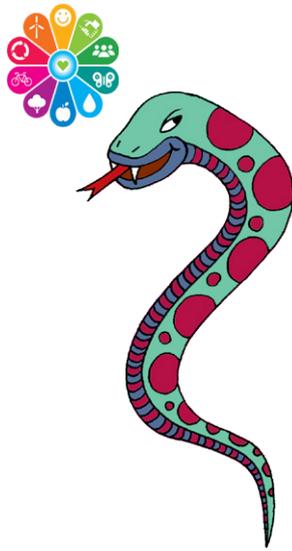

Pupils stick 'Think before you print' signs by all the computers.

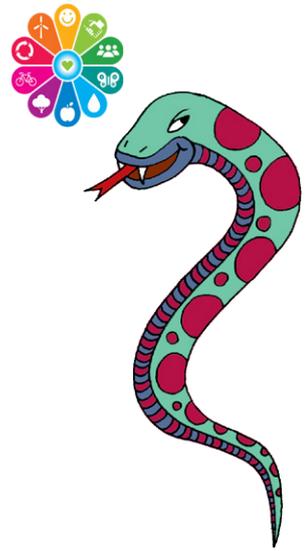

Zero waste

Most of the paper in the school's recycling bins has only been used on one side.

Zero waste

The Eco Team check the recycling bins and find several crisp packets.

Zero waste

A parent buys disposable cups and plates for an end-of-term party.

Zero waste

A teacher accidentally prints 320 worksheets instead of 32.

Zero waste

You discover that the staffroom does not have a recycling bin.

Zero waste

You spot an unused compost bin in the school grounds.

Zero waste

Teachers and children are confused about what they can recycle at school.

Zero waste

Children often have drink cartons or pouches in their packed lunches.

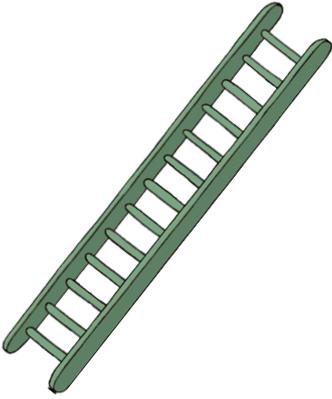

Zero waste

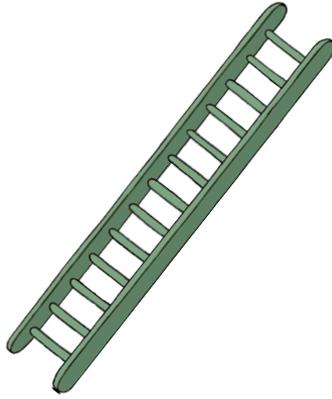

Unclaimed uniforms from Lost Property are thrown in the bin.

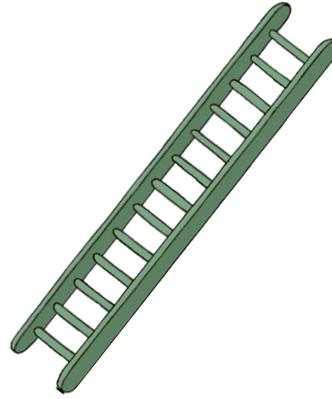

Zero waste

The Eco Team do a brilliant assembly about saving water.

Sustainable
water

The school cleaners use environmentally friendly cleaning products.

Sustainable
water

The caretaker checks all the taps for drips.

Sustainable
water

The school installs several water butts to collect rain water.

Sustainable
water

The school's toilets are flushed using rainwater.

Sustainable
water

The Headteacher chooses a water-efficient dishwasher for the staffroom.

Sustainable
water

Children always turn off the tap after they've washed their hands.

Sustainable
water

All the school's toilets have water-saving flushes.

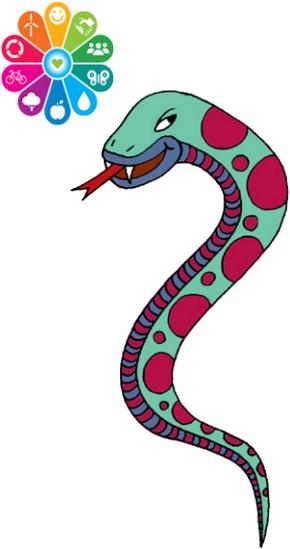

Sustainable
water

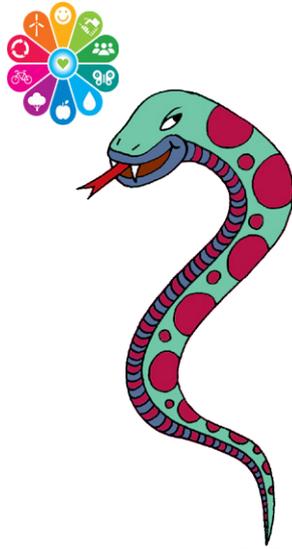

The Business Manager keeps track of the school's water bills.

Children often leave taps running after they have washed their hands.

Sustainable
water

Somebody switches the staffroom dishwasher on when it is only half full.

Sustainable
water

The school has a big leak in the underground water pipes and nobody notices.

Sustainable
water

Children water the vegetables they are growing with tap water.

Sustainable
water

You notice a dripping tap but forget to tell the caretaker.

Sustainable
water

There is a water butt in the playground but nobody uses it.

Sustainable
water

Somebody puts paper towels down the toilet and blocks the pipes.

Sustainable
water

The kitchen staff pour used cooking oil down the drain.

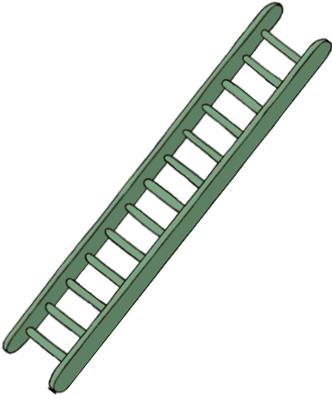

Sustainable
water

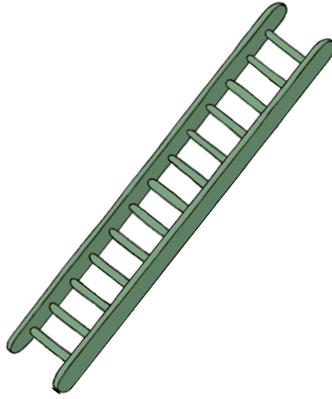

After-school club have a water fight and waste a lot of water!

The caretaker helps the Eco Team to build a pond.

Land use and wildlife

As part of their lessons, pupils make bird feeders for the school grounds.

Land use and wildlife

Several year groups visit the local park as part of their science and geography work.

Land use and wildlife

The Eco Team set up a composting area in the school grounds.

Land use and wildlife

Each class has a raised bed for growing fruit and vegetables.

Land use and wildlife

The Headteacher holds a staff meeting about outdoor learning.

Land use and wildlife

Children and teachers can name the trees and plants growing in your school grounds.

Land use and wildlife

The Eco Team do an assembly to spread the word about our amazing Biosphere.

Land use and wildlife

You borrow the BHee infra-red camera to find out what wildlife uses your school grounds at night.

Land use and wildlife

You overhear a teacher saying “Only Reception children can learn outside.”

Land use
and wildlife

The last time children visited your wildlife area was June 2013.

Land use
and wildlife

You see a group of children treading on ants at playtime.

Land use
and wildlife

Your compost bin is fully of fruity sludge.

Land use
and wildlife

Your pond dries up in the summer.

Land use
and wildlife

A teacher cancels an outdoor lesson because the weather is “chilly”.

Land use
and wildlife

Trampling footballers ruin your wildflower area.

Land use
and wildlife

Your Headteacher screams and runs to the staffroom when s/he sees a spider.

Land use
and wildlife

You overhear a teacher saying “There aren’t any interesting habitats near our school.”

Land use
and wildlife
